AGE-DEFYING

Let us maintain our youthful appearance during the time! With age, the skin naturally loses elasticity and firmness, leading to the formation of wrinkles. With Evonik's sophisticated ingredients, you can combat the visible signs of aging.

AGE-DEFYING

PRODUCT		AT A GLANCE	PROFILE							REGULATION	CERTIFICATION	
TRADE NAME	INCI	BENEFITS	TECHNOLOGY PLATFORM	SOURCE		SOLUBILITY	FORM	RECOMMEND. USE LEVEL (%)	SHELF LIFE	IECIC COSMETIC REGULATION CHINA (CFDA)	COSMOS STATUS	HALAL STATUS
AquaPront®	Water/Aqua; Alcohol; Glycosphingolipids; Hordeum Vulgare Extract; Sodium Hyaluronate	<ul style="list-style-type: none">» A unique combination of protectant and moisturizing agents:<ul style="list-style-type: none">- Hyaluronic acid (moisturization/anti-aging)- Barley extract (skin-conditioning)- Glycosphingolipid (lipid barrier protection)» Delivers instant wrinkle filling effects on skin's surface» Smoothens the skin in depth in the long-term	Delivery Systems	 				2.0 - 6.0	360 days at 4 °C	yes	not compliant	certified
HyaCare®	Sodium Hyaluronate	<ul style="list-style-type: none">» Naturally occurring skin-identical hyaluronic acid» Manufactured from an environmentally friendly and safe source» Reinforces the skin's natural short- & longterm moisturization» Improves the barrier function of the skin» Improves skin elasticity» Reduces maximum skin roughness resulting in reduced wrinkle depth	Hyaluronic Acid Specialities	 				0.01 - 0.2	720 days at 4-10 °C	yes	not compliant	certified

BARRIER FORTIFY

Successfully maintaining a strong skin barrier ultimately requires continuous attention throughout the year. Biology and external environmental stressors require replenishment of skin's important building blocks. With Evonik's functional ingredients, the skin's barrier can be maintained throughout the year despite seasonal changes.

BARRIER FORTIFY

NOURISHING

.....

Just as it is important to feed your soul, feeding your skin is equally crucial. Your skin can wear down if nutrients are diminished from within.

Evonik ingredients can bolster the components of the skin, thus supporting hydration, re-vitalizing the skin's natural defensive properties and promoting a youthful appearance.

SUSTAINABILITY

BECAUSE IT'S
PERSONAL

OUR ATTITUDE TOWARDS SUSTAINABILITY

Our products are extremely personal – consumers quite literally put them on their skin – which means the ingredients are of the greatest importance. We're always striving to come up with better, more beneficial and nourishing formulas – so that consumers can fully experience and maintain their natural beauty. And it's this same attitude that we bring to the environment: to respect, nourish, preserve and enhance. Consumers, too, are clearly concerned about issues such as biodiversity loss, ocean littering and the over-exploitation of natural resources. No longer an abstract future scenario, this is a tangible reality even today, and for each and every one of us. Consumers today know their choices make a difference for the protection and beauty of both their skin and the natural world. At Evonik, we dedicate our research and development to indirectly enabling consumers to make a positive impact – for their personal wellbeing and that of the planet.

As a company, we're fully conscious of the impact our activities have on the environment and society. Sustainability aspects are involved within all business decisions and there's always scope for innovative new solutions.

CARE Solutions clearly aims for:

- **Carbon neutral processes**
- **Fair and ethical business practices**
- **Products for environmental friendly cosmetics**

This is why we've been working to move sustainability concerns to the core of our business activities – and to reconcile them with our business objectives. When it comes to our business processes, product portfolio and the raw materials we use, we're convinced that adopting a proactive rather than reactive stance to sustainability will benefit consumers just as much as society and the planet.

THE CAREtain® TOOLBOX OFFERS FULL TRANSPARENCY

Our most important objective – and greatest challenge – is to create and maintain transparency. Only transparency allows us to identify non-sustainable areas in the value chain and improve them effectively. While our efforts may not necessarily be visible to end consumers, we do our part to create differentiation options for cosmetics manufacturers, and the choices these manufacturers make are ultimately passed down to consumers.

Our **CAREtain® Toolbox** is a dynamic, ever-growing information system which has allowed us to quantify, qualify and make tangible our sustainability attitude – for our clients and us as a company. The toolbox currently maps the most important sustainability aspects with impact on sourcing, processing and application for our cosmetics ingredients. It includes such categories as RSPO-certified, biodegradability, COSMOS status, vegan and origin.

With the **CAREtain® Toolbox**, Evonik aims to create transparency as well as a sustainable edge regarding its products and raw materials – and to provide its clients with an instrument for developing their own eco-optimized products.
